DEFECTS AND ABUSES IN SEWER SYSTEM.

Engineer's Report to State Board of Health Recommends Measures to Correct Evils.

DISCUSSES SEWAGE DISPOSAL

Legislation Necessary to Prevent Pollution of Natural Water Supplies-State Sewer Commission Suggested.

The report of Consulting Sanitary Engineer Hiram Phillips, which will be prosented to Doctor C. L. McElwee, president of the State Board of Health, in St. Louis, to-day, will recommend asking the State Legislature for such legislation and approriations as may be required to enable the board to cause the correction of nulsances and abuses in existing sewer systems; and to vest the board with power to approve or disapprove proposed sewer systems and

sewage disposal plants. Another recommendation, more or less in sympathy with the opinions of Health Commissioner Starkloff and Sewer Commissioner Hermann, urges the necessity of a legislative measure authorizing the State Board of Health to preserve natural water supplies from pollution. Mr. Phillips's recommendation follows Doctor Starkloff's declaration that the River des Peres is a constant menace to public health and Mr. Hermann's plea for the establishment of sandard district severe is a constant to the country district. itary district sowers in the county to divert and carry off the sewage. Maintaining that the State should create

Maintaining that the State should create a commission, to set in concert with the State Board of Health, to investigate into sewage conditions throughout Missouri, Mr. Phillips's report states that cities and towns cannot be expected to conduct independent investigations on a commensurate scale, because of the enormous expense it would entail upon each municipality, inasmuch as the process would be similar in most instances, and much useless work would be done. He surgests that the State would be done. He suggests that the State

would be done. He suggests that the State should institute and pursue investigations for the benefit of all localities.

This supervision of sewer systems is all the more necessary, in his opinion, because conditions prevailing in adjoining counties or districts frequently operate in such a manner as to cause one locality to suffer detriment in consequence of sanitary evils existing in another.

Mr. Phillips exhibits a certain preference for the "septic tank system," which is used in Berlin, London and other European cities, but an comparatively few cities in this country. Independence, Mo., a city of 6.714 inhabitants, has a plant of this kind that cost \$27,50.74 Mr. Phillips praises the city liberally for its enterprise in adopting what appears to him to be the most modern and sanitary system for the disposal of sewage.

This system disposes of sewage by chem-

sewage.

This system disposes of sewage by chemical decomposition by means of septic tanks and filter beds. While the system is employed in several European cities, many American sewer experts have not yet thoroughly approved of it as suitable for large cities, as it is considered too expensive.

REPUBLIC SPECIAL.

Sergeant James Hickman of the Mounted
District police fought a pistol duel on horseback with a horse thief on the outskirts of
the city at 5 o'clock yesterday morning.
Twice his horse fell beneath him and his
Licutemant Hanna and a souad of mountleft arm was paralyzed by a bullet, but he fought on until he had wrested the horse thief's revolver from him and beat him on the head with it. The thief finally managed to escape in the darkness. Captain McNamee of the Mounted Dis-trict detailed twenty men to search for the thief, and he thinks it will be a matter of

only a few hours until he is captured. Sergeant Hickman was patrolling his pre-cinct on horseback about 5 o'clock when he met a man at Macklind and Manchester avenues riding a horse and leading another. It was yet quite dark. Hickman stopped

the stranger and asked him where he got the horses. The man replied that they be-longed to him and that he was taking them from his place at Pacific, Mo., to sell them to a milkman in St. Louis. Not being satis-fied with the explanation, the Sergeant placed the man under arrest and started for the station in Forest Park.

Hickman was not able to search his pris-

oner on horseback, but thought he would meet an officer in the course of a short ride. About 300 yards north of Macklind avenue the prisoner, unobserved by Hickman, pulled a revolver and shot directly at him at a range of four feet. The bullet took effect in the muscles of Hickman's left arm between the elbow and the shoulder. Hickman immediately drew his revolve

and started for his prisoner, who had dropped from his horse and was firing from the ground. The Sergeant opened fire, but his horse, having been shot twice in the neck, reared and fell, disconcerting the rider and destroying his alm. Two more bullets from the horse thief's revolver plerced the Sergeant's coat but did not en-ter the flesh. When each of the duellsts had emptied his revolver Sergeant Hickman, who had remounted, charged upon the thief, and, taking his revolver from him, beat him on the head with it. In trying to guide his horse Hickman for the first time guide his horse Hickman for the first time found that his left arm was parelyzed. His

SAVAGE ATTACK ON DAWES COMMISSION.

Pettigrew Says There Is "No More Corrupt or Extravagant Body" in American Service.

CALLS FOR ITEMIZED ACCOUNT.

Senator Butler Thinks Children With Red Hair and Freckled Faces Have No Right in Indian Schools.

Washington, Jan. 34.-The Senate devoted the day to the Indian appropriation bill and made only fair progress. The chief feature of the debate was a sharp attack by Mr. Pettigrew on the Dawes Commission, which he said was extravagant and was accomplishing little in the way of results. An interesting announcement made by him was that he did not purpose to fillbuster against any bill. The shipping bill was not taken up, but to-morrow will witness a speech on it by Mr. Depew. It will then give way to appropriation bills, Mr. Frye saying to-day he did not wish to de-

At the opening to-day the Senate adopted the Pettigrew resolution concerning the re-

ported deportation of A. Mabini, a citizen of the Philippines, to Guam.

During the consideration of the appropriation for Indian school Mr. Butler said he had visited such schools and observed that there were present taking advantage of the benefits children who were not Indians, and he asked what proportion of Indian blood was necessary to secure admission to such schools. such schools.

Mr. Thurston answered that no children

are received unless they are regarded as Indians by the tribes, no matter how slight the admixture of Indian blood. He had, he the admixture of Indian blood. He had, he said, seen in a tepee with a woman evidently an Indian squaw children of her own who had red hair. It was impossible, he said, to exclude children from the schools merely because they might have red hair of a light skin.

Mr. Butler insisted that many of the children who were attending Indian schools were white, and that the abuse of the Indian school appropriation was flagrent and notorious.

were white, and that the abuse of the Indian school appropriation was flagrent and notorious.

Mr. Jones of Arkaneas added that he knew many Indan children who had freckled faces, blue eyes and red hair.

Mr. Pettigrew of South Dakota expressed the opinion that the whole Indian schools system ought to be overhauled. He was inclined to believe that many of the Indian schools in the East might better be abolished, and in this connection he referred particularly to the Carlisle School.

Mr. Pettigrew made a vigorous attack upon the Dawes Indian Commission, asserting that there was no more corrupt or extravagant body in the serivce of the United States than that commission. He attacked particularly the increase from \$33,-500 to \$300.00 of the appropriation for the commission. He believed the work done by the appraisers of the Indian lands could be done for 10 per cent of what the Government was paying for it.

Mr. Jones of Arkaneas maintained that the criticism by Mr. Pettigrew of the Dawes Commission was not well founded in any respect. The work, Mr. Jones said, was being done economically and thoroughly.

Mr. Aldrich of Rhode Island reported the war-revenue reducton bill from the Committee on Finance and gave notice that he would call up the measure the first of next week. He added that the committee had amendments covering the sale of stock and merchandise under consideration which would be submitted at an early date.

Mr. Pettigrew offered an amendment providing that the Dawes Commission shall file an itemized statement of its expenditures to January 1, 1901, and annually thereafter. The amendment was accepted, and an amendment making the total appropriation for the commission Sci.00 was adopted.

Washington, Jan. 24.-By a party vote of day ordered a favorable report on the bill of Representative Hill of Connecticut. "To maintain the silver dollar at parity with gold."

Chairman Southard presented a dispatch received from Mr. Bryan at Lincoln, Nob., saying: saying:

The Hill bill, as reported, is as follows:
